

# BELGRAVIA MILL READY TO START

Big Plant Has Been Practically Completed for a Month.

May, Ariz., May 15.—There is all assurance that the new big Belgravia mill at Belgravia will be started before the end of this month. It has been almost complete for a month past, lacking only some electrical equipment and a few small, but material, odds and ends. There also have been known delay and trouble in securing the very essential railroad locomotives at Ray, where even now the spur track to the mill ore bins is blocked by an injunction. Still, the directors affirm that never before in Arizona has such a plant been erected in so short a time. It is of new design, yet as approved by the best building experts with only a few constraining tables and those for sampling or testing. The ore, very finely crushed, is almost direct to flotation, which is expected to give very high extraction, possibly reaching 95 or even 98 per cent of contained copper values. Handling of ore will be very nearly automatic, from the big skip cars at the mine to the mill, and the mill itself will be handled by a single man. The mill capacity of 1200 tons a day will be maintained 17 hours a day, even on the railroad.

**Blas Filled With Ore.**  
The mill already is filled with ore that has come from broken down of haulage drifts, for few steps have been opened yet. Drilling from the surface was stopped without full definition of the extent of the ore lenses, which are to be explored hereafter by lateral drifting as a means of economy. All the upper-level ore is to be stepped down to the first level, on the 7th level of the main shaft. The mill will start with the company about \$400,000 in debt, the money secured at 5 per cent on joint notes endorsed by the directors.

**Production For Year Goals.**  
The Ray Consolidated report for the last year shows a production of 92,287,254 pounds, a record for the mine and an increase of 18 per cent over the previous year. On the debit side are put added operation and tax costs that amount to 230 cents a pound over the cost of the year before. A statement was made during the year to develop added resources, as only one-sixth of the total developed tonnage thus far has been broken down. The total underground development up to the close of 1917 was 123 miles. More than half of this has been caved, leaving 59 miles of workings intact. The year's ore production was 2,460,764 tons, averaging 2,048 cent copper. A steady production is aimed at of 10,000 tons a day. Many changes of equipment have been necessary in the big mill at Hayden. It is believed by the management that this item of expense will be materially abridged in the future as operating conditions now appear about as good as they can be made. Report is made that the Ray company is doing business with other corporations, has purchased a large coal mine, securing a fuel supply at a valuable price.

**Stigma Expires for Year.**  
The Magma Copper company, at Su-

**THIS IS THE AGE OF  
YOUNG WOMEN**

And women with the look  
of youth.

Everywhere it is the young or  
young looking woman who is making  
the most of the wonderful opportuni-  
ties for woman today. The good  
things are not for those who seem  
to have passed their greatest usefulness.

Don't let gray, streaked with gray,  
or faded hair with its look of age,  
rob you of your chance. You can  
easily regain all its youthful beauty  
as many other women have by using  
Q-bar Hair Color Restorer occasionally.

Q-bar will not dye your hair. It  
simply brings back the natural color  
and gives it a delightful tinge  
regardless that should not be confused  
with hair dyes and other such prepara-  
tions. Q-bar will not stain the scalp,  
wash or run off. It does not  
interfere with shampooing or saving  
the hair. Easily applied.

Sold by all good druggists every-  
where on Money-Back Guarantee.

Price 75c—Adv.

# Arizona Mines Produce Half Of Smelted Copper

Property Bought For \$1800  
and Sold for \$500,000  
Involved in Decision.

Bisbee, Ariz., May 15.—The Arizona Chapter of the American Mining Congress figures that Arizona during the month of April produced very nearly one-half of the copper smelted within the United States. The month's production output for the state was 76,228,000 pounds, compared with a gross national refinery product of about 150,000,000 pounds from nationally produced bullion. To this, however, may be added about 20,000,000 pounds from foreign ores, concentrates, malle or bullion.

**Douglas Smelter Leads.**  
In Arizona the month record, equal to the best month in 1917, was led by the Phelps-Dodge smelter at Douglas, 15,300,000 pounds. The major producers followed in descending order: Douglas, 15,300,000; United Verde, 7,000,000; Ray Consolidated, 2,500,000; Chino, 2,000,000; El Paso, 1,500,000; Magma Consolidated, 1,500,000; Arizona Copper, 1,500,000; Calumet & Arizona, 1,500,000; New Cornelia, 1,500,000; Pima, 1,500,000; Dominion, 1,500,000; Pachuca, 1,500,000; Detroit, 1,500,000; American Smelting and Refining, 1,500,000; Shannon, 1,500,000; Shattuck, 1,500,000.

**April Output.**  
The April output was set down much lower than the previous year, but it was a record for the month. The output for the month of April was 76,228,000 pounds, compared with a gross national refinery product of about 150,000,000 pounds from nationally produced bullion. To this, however, may be added about 20,000,000 pounds from foreign ores, concentrates, malle or bullion.

**Production For Year Goals.**  
The Ray Consolidated report for the last year shows a production of 92,287,254 pounds, a record for the mine and an increase of 18 per cent over the previous year. # FAMOUS WORLD'S FAMINE SOLD

Eastern Company Said to  
Have Taken Charge of  
Rich Property.

Palangula, Ariz., May 15.—The famous World's Fair mine of eight claims is reported sold to an eastern company, which already has taken charge, though no publicity thus far has been given to names or to the consideration involved. It is now being sampled by A. A. Holland for the purchaser. The mine was sold by Frank Powers, who in 1915 bought it of William Moran for \$100. Powers all it is said, the mine has produced about \$1,000,000 in lead, copper, gold and silver, the area being complex, as is common in this section. Development of the mine is being made by the eastern company, with a rough estimate of at least \$1,000,000 worth of ore now in sight.

**Plains Area Plant.**  
The property is located in Harshaw district, south of this point. It had its first location in 1872, and was abandoned before relocated by Moran.

**Dr. John R. Magruder.**  
Dr. John R. Magruder, of Tucson, has been gathering statistics here concerning the quantity of iron or copper pyrites available to secure the bulk of the famous World's Fair mine. He is said to have found available pyrites in enormous masses, and to have recommended to the eastern company that it be developed. The mine is said to be the largest ledge of the district, suitably of that on the Three R property.

**REPUBLIC MINE SHIPS 14  
CARS ZINC SULPHIDE EAST**  
Dundas, N. M., May 15.—N. S. Nord, of this city and a member of the Republic Mining and Milling Co., says that concern shipped to Philadelphia last month 14 cars of zinc sulphide ore. This ore has to be at least 50 per cent zinc sulphide.

**Day Of Woman Has Arrived; Wants  
More Of Living, Less Of Luxuries**  
Tribute for the part which women's clubs have played in the mental emancipation of womanhood was paid to these organizations by the Rev. John M. Jackson in a Mother's day sermon delivered in the First Methodist Episcopal church.

**NEW MEXICAN ON BOARD  
TO EXAMINE AIR PILOTS**  
Santa Fe, N. M., May 15.—Capt. W. D. Twiss, son of Col. Ralph R. Twiss, of the New Mexico National Guard, is on board the Santa Fe, en route to Mexico, to examine air pilots.

# Court Decree Affects Mines Around Bisbee

Output For April Totals  
76,228,000 Pounds  
Of Bullion.

Phoenix, Ariz., May 15.—The California Arizona mines at Bisbee are affected to a degree, as well as the acquired property of the Lumber Super and Pittsburg company by a decision of the supreme court of Arizona, in the case of Cunningham vs. Costello. This concerns a claim of the heirs of Patrick Cunningham to at least one-half of the sums received by Martin Costello of Tombstone, who sold about 20 mining claims in Bisbee in 1909 and 1910 to the C. & A. The claim was sold to the Lumber Super and Pittsburg company by a decision of the supreme court of Arizona, in the case of Cunningham vs. Costello. This concerns a claim of the heirs of Patrick Cunningham to at least one-half of the sums received by Martin Costello of Tombstone, who sold about 20 mining claims in Bisbee in 1909 and 1910 to the C. & A.
